SERIES 1230 / 1830

Designed for Use In Conjunction with:

- Extruding Operations
- Bag Making Equipment
- Sheeters / Die Cutters
- Packaging Machines
- Slitter / Rewinder

Will Print:

- Variable Information
- **■**Company Logos
- **■**Warning Messages
- Striping Applications
- ■Adhesive Laydown
- **■** UPC Symbols
- ■Recycle Logos

Available with enclosed
Doctor Blade Assembly *
*Conversion kits available

BELL-MARK Flexographic Printer

The 1230 / 1830 Single Color Flexographic Printers are designed to print any variable information on poly, paper, and foil. Ideally suited for narrow width printing applications, these printers are especially cost effective when compared to the expensive press time of a wide web flexo.

Features

- ■Mounts easily in-line on bag machinery / extruders
- ■Sturdy 3-frame construction design
- Mechanically engraved anilox roll, chrome plated
- Fine thread screw adjustments on fountain roll & print cylinder
- ■Stainless steel shafting & ink fountain
- ■Friction driven, direct drive or DC drive

Benefits

Eliminates costly pre-printed film inventories

Stable, vibration-free operation Assures high quality, crisp printing

Guarantees accurate metering

Corrosion free from alcohol & water based inks

Simple and versatile operation
